# Strategically Located Assets

- Located in Corn Belt
- 54% of corn planted in 2012 was within \$45/UAN ton freight rate of plant
- ~\$15/UAN ton transportation advantage to Corn Belt vs. U.S. Gulf Coast

\* Impacted by major scheduled turnaround.

# Fully Utilized Capacity & High Run Rates

- Capacity: 1,225 tons/day ammonia unit & 3,000 tons/day UAN unit <sup>(1)</sup>
- 2012 on-stream efficiency <sup>(2)</sup>
  - Gasifier: 98.1%
  - Ammonia: 97.1%
  - UAN: 92.8%

(1) 1.0 ton of ammonia converts to 2.44 tons of UAN.

(2) Excludes impact of major scheduled turnaround (scheduled to occur every two years) and third party air separation unit outage. Including impact of turnaround and third party outage, on-stream efficiency would have been 92.6% for gasifier, 91.1% for ammonia, and 86.4% for UAN.

NYSE:UAN

## Feed Stock Advantages

- Utilize pet coke as feed stock versus natural gas
- Lower production cost compared to competition
  - Advantage when natural gas price is higher than ~\$3.65/MMBtu\*
- 70% of pet coke requirement contracted through 2027
  - Abundant supply from 3<sup>rd</sup> parties available by rail at attractive prices for remaining 30%
- Dual train gasifier insures reliability
- Capacity to sequester 100% of CO<sub>2</sub> emissions

\* Reflects estimated Henry Hub price, which excludes transportation cost to plant gate. Delivered to plant price is estimated at ~\$3.90/MMBtu.

# UAN Plant Expansion

- \$130MM project completed in 2013 Q1
- Capitalize on historical price premium of UAN to ammonia ( $\text{NH}_3$ )
- Ability to upgrade 100% of  $\text{NH}_3$  to UAN <sup>(1)</sup>
  - Expanded UAN capacity by ~50% to ~1MM tons/year
  - Previously upgraded ~70% of  $\text{NH}_3$  to UAN
  - No longer selling substantial amount of  $\text{NH}_3$
  - Add'l conversion cost of ~\$15 per UAN ton
- Current spot prices<sup>(2)</sup> indicate premium of ~\$70 per add'l UAN ton from converting remaining ~30% of  $\text{NH}_3$  to UAN <sup>(3)</sup>

UAN Price Premium to Ammonia\*

Note: UAN Mid Corn Belt to Ammonia Southern Plains (with plant conversion factor of 2.44).

\* Indicates price premium only (i.e., before incremental processing costs, etc.).

(1) 1.0 ton of ammonia converts to 2.44 tons of UAN.

(2) Green Markets spot prices (November 11, 2013) for Southern Plains Ammonia (\$485/ton) and Mid-Corn Belt UAN (\$286/ton).

(3) ~\$70 per add'l UAN ton is net after incremental conversion costs of \$15 per add'l UAN ton and plant-specific conversion efficiency.

## Non-GAAP Financial Measures

To supplement the actual results in accordance with U.S. generally accepted accounting principles (GAAP), for the applicable periods, the Company also uses certain non-GAAP financial measures as discussed below, which are adjusted for GAAP-based results. The use of non-GAAP adjustments are not in accordance with or an alternative for GAAP. The adjustments are provided to enhance the overall understanding of the *Company's* financial performance for the applicable periods and are also indicators that management utilizes for planning and forecasting future periods. The non-GAAP measures utilized by the Company are not necessarily comparable to similarly titled measures of other companies.

The Company believes that the presentation of non-GAAP financial measures provides useful information to investors regarding the *Company's* financial condition and results of operations because these measures, when used in conjunction with related GAAP financial measures (i) together provide a more comprehensive view of the *Company's* core operations and ability to generate cash flow, (ii) provide investors with the financial analytical framework upon which management bases financial and operational planning decisions, and (iii) presents measurements that investors and rating agencies have indicated to management are useful to them in assessing the Company and its results of operations.

NYSE:UAN

# Non-GAAP Reconciliation

**EBITDA:** Defined as net income before (i) net interest (income) expense; (ii) income tax expense; and (iii) depreciation and amortization expense, which are items management believes affect the comparability of operating results.

**Adjusted EBITDA:** Defined as EBITDA further adjusted for the impact of share-based compensation, non-cash and, where applicable, major scheduled turnaround expense and loss on disposition of assets. We present Adjusted EBITDA because it is a key measure used in material covenants in our credit facility and because it is the starting point for our available cash for distribution. EBITDA and Adjusted EBITDA are not recognized terms under GAAP and should not be substituted for net income or cash flows from operations. Management believes that EBITDA and Adjusted EBITDA enable investors and analysts to better understand our ability to make distributions to our common unitholders and our compliance with the covenants contained in our credit facility. EBITDA and Adjusted EBITDA presented by other companies may not be comparable to our presentation, since each company may define these terms differently.
